

BASF Construction Chemicals España, S.L.

**MasterSeal 912 (old MASTERFLEX 612W)  
LEED Product Declaration**

**MasterSeal 912** is a one component moisture curing pre-polymer, re-swellable when in contact with water, suitable for the permanent sealing of construction joints in concrete structures.

We hereby confirm,

1. that during the production process of **MasterSeal 912** no toxic substances as formaldehyde, asbestos, lindane, chlorinated biphenyls, pentachlorophenol or other forbidden substances are used.
2. the following VOC-content (VOC up to 280°C) of less than 1 g/L according to "SCAQMD Rule 1168 for Adhesives and Sealants"
3. that the product deliberately does not contain any of the exempt compounds of SCAQMD 102
4. that the product contains less than 5% of post-consumer material recycled content from the normal recovery of raw materials in manufacturing processes.
