

Thermia MBH

The water heater that works quickly and efficiently.

The **Thermia MBH** is an extremely efficient water heater designed for compatibility with the Thermia heat pumps.

The water heater's TWS technology* assures highly efficient heat transfer and better layering of the water than traditional technology. This means your water is heated more quickly, less energy is consumed and the hot water lasts longer when using large amounts.

The water heater is available in two sizes, 200 and 300 litres, and has a stainless steel tank. Optional front cover design to match selected heat pump.

The 200-H version has free space below the heater which can accommodate the underfloor heating centre, for instance.

MBH 200

MBH 200-H

MBH 300

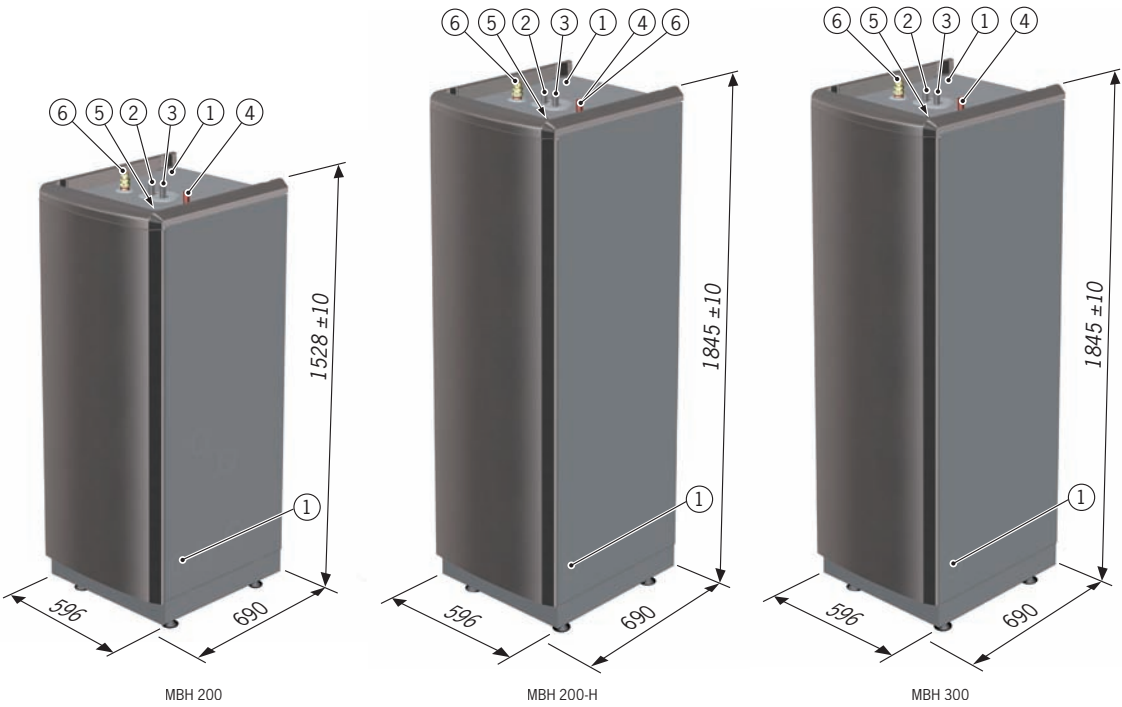

* TWS = Tap Water Stratificator. Patented heating technique for water heaters, developed by Thermia.
